

The SUN is forging ahead of all papers in the First District. All the news that's worth reading is in The SUN.

The Paducah Sun

WEEKLY EDITION.

VOLUME VII.—NUMBER 5.

PADUCAH, KY., THURSDAY EVENING, JANUARY 31, 1901

\$1 A YEAR

NEWS AND COMMENT.

The body of Jude N. Pearl, who disappeared from Port Gibson, Miss., two weeks ago, was found in the river, with heavy weights attached.

The creditor committee of the suspended Morris bank, of Montgomery, Ala., reports total assets of \$1,506,841, and liabilities \$1,325,233.

Li Hung Chang is said to be suffering from fever and delirium and his life is despaired of.

The big steel war threatened between the Morgan interests and Carnegie is reported adjusted.

The Missouri legislature has up a two cent fare bill. Its fate is quite uncertain.

The report that Mr. Paul Kruger is again seriously ill at Amsterdam is denied.

A Chicago dealer is mixing gum and tobacco as a new chew.

It is believed some one is working a corner in cotton.

President McKinley was 58 years old yesterday.

WINGO BANK.

TEMPORARILY SUSPENDED DURING A CHANGE OF

The Cashiers—Other Graves County Notes of Interest—to the People.

Yesterday's Maxwell Messenger.

The bank of Wingo closed its doors last Friday, when the directors decided advisable during a change of cashiers. There was some dissatisfaction among the directors with the management of Cashier J. M. Brann, and a movement was started to get another cashier.

As stated in the Messenger, Judge D. B. Stanfield, of the City National bank, went down last Friday on the invitation of the authorities of the Wingo bank to look over the affairs of the institution; and as a result of his investigation, Mr. Brann vacated the position of cashier, and Jas. Tartt was selected to succeed him.

The bank opened up again for business this morning, and Ralph Stanfield, who has been in the banking business in Louisville, went down this morning to assist the new cashier until he gets familiar with the routine of the work. Mr. Brann has moved his family to Fulton, where he formerly resided. The bank stock is owned by citizens of Wingo and Fulton, and the capital is \$15,000. The bank has been running about two years.

Pastor Webb, of the C. P. church, has divided the city into eight districts with reference to his church, and appointed two leaders, or overseers, who are expected to work up better interest among the members and others in the Sunday school, prayer meeting and church services.

Each district is to hold four fellowship meetings a year, and each member in the district is expected to visit each other member at least twice a year in the interest of the church. A union fellowship meeting will be held at the church once a year.

This is a new plan the pastor has originated, and will doubtless bring gratifying results.

The corn crib of Tom Short, a few miles from Wingo, burned last night, under circumstances which suggested arson, and he sent to Fulton for blood hounds this morning to see if a trail could be found. He lost about thirty barrels of corn in the fire, which was past control when discovered.

Rose Dowdy filed a novel damage suit today against J. S. Perkins and C. Jack Dowdy, asking judgment for \$1,000. She says they had her wrongfully arrested, on the 17th inst., on a writ of lunacy, from which she was discharged on investigation, and she was humiliated and otherwise injured in feeling to the amount stated. Crutchefield and Palmer are her attorneys.

STATE NEWS

The United States Judicial Bill Reported, Fixing Two Districts and Places for the Courts.

CORBIN FEUDISTS TRIAL

Notorious Murderer Thought to Be Freed Gave Pursuers the Slip Last Night.

GIBSON'S CASE UP AT CATLETTSBURG

Catlettsburg, Ky., Jan. 30.—The case of Wm. Gibson, who brutally murdered a little step daughter, by shooting a red hot poker down her throat, is up for trial. It is proving hard work to get a jury. The talk of lynching is not so rife, now that Gibson is before court.

Williamsburg, Ky., Jan. 30.—The Corbin feudist case is on trial. The accused are charged with murder. There is interest and an undercurrent of feeling which needs but a kindling to grow serious. The court house is being guarded.

Middlesboro, Ky., Jan. 30.—Sheriff Andy Hughes, of Claiborne county, Tennessee, who, with a large posse, had Lewis Myers, an alleged desperate Virginia criminal, who has five killings to his credit, surrounded in a log house on Taggart's creek, twelve miles from here, let Myers get away, but captured the woman with the outlaw. Twenty-two hundred dollars reward has been offered for the arrest of Myers. Myers says he will not surrender. Sheriff Hughes says he will be taken dead or alive. A posse is in pursuit of Myers.

Washington, Jan. 30.—The new judicial bill for Kentucky, which divides the state into two districts, has finally been reported by the senate committee. The bill provides for court at Paducah on the second Monday and the third one in November.

MR. BARNHILL'S WILL.

HE LEAVES ALL HIS PROPERTY TO HIS MOTHER.

A copy of the last will of the late Mr. W. P. Barnhill, Jr., who died in Texas and was buried at Savannah, Tenn., was filed for probate in the county court here today.

He leaves his half interest in the Barnhill Stock yards here, and his half interest in the company's property in Harlan county, Tenn., to his mother, Mrs. Annie Barnhill, likewise all his other property, all of which his father is to hold in trust. His father, Mr. W. P. Barnhill, Sr., is appointed executor.

STREET EXTENSION.

MESSRS. KATTERJOHN PREPARING TO ERECT NEW HOUSES.

The Messrs. Katterjohn are extending Hubbard street through to the hollow, building quite a fill, and as soon as completed, will build a row of houses on each side of it.

Knoxville, Tenn., has secured the removal to that place from Ohio of a big shoe factory. A free location and expense of removal are assured by Knoxville.

STAMP DEPUTY.

MR. C. C. ROSE IS APPOINTED TO AN IMPORTANT INSURANCE POSITION.

Mr. C. C. Rose, secretary of the local board of insurance underwriters, has been appointed stamp deputy for the Kentucky and Tennessee board of underwriters for Paducah, effective February 1. This is an office of great importance and it is the first time Paducah has been furnished with such a representative of the board.

The position carries with it a salary of about \$1,500 a year, and the duties of the deputy are to inspect all daily reports of local insurance agents before they are forwarded to their respective companies, and if rates and risks are found satisfactory, will receive the stamp of the deputy and be forwarded by him to the proper company, instead of by the agent himself, as heretofore. Another important duty of the stamp deputy is to inspect buildings, decide questions of rates and such things. The expenses of the place are borne by the companies doing business in a place.

A CHURCH

SELECTED BY WILLIAM DALTON AS A SUITABLE PLACE

To Break Into—Arrested at Noon for Breaking Into the Broadway Methodist Church.

Billy Dalton, a white man about 38 years of age, was arrested about noon today on a charge of breaking into the Broadway M. E. church, at Seventh and Broadway.

Edward Reynolds, the colored janitor, claims that a few days ago he had some clothing stolen from the church. Today he caught Dalton there with a coat, vest, brush and bicycle lamp he had stolen today. He is alleged to have gained entrance by breaking in, and the property belonging to Reynolds he was arrested by Chain Gang Overseer Joe Woods and Assistant A. Townsend, and Reynolds swore out a warrant against him for house breaking.

The case is set for tomorrow morning before Judge Sanders.

A SAD DEATH.

MR. CHARLES GLASS SUCCEUMBS TO PNEUMONIA.

Mr. Charles Glass, aged 27, a well known grocer in the employ of Mr. Louis Clark, died about noon today at his home on South Eighth, from pneumonia, after a two weeks' illness.

He was born in Illinois, where his parents, who are now here, reside, but had lived in Paducah for many years, and formerly with his brother owned a grocery at Third and Jackson streets.

He was married about a year ago to Miss Merrick, who survives him. He also leaves a brother, Engineer Dan Glass.

The deceased was a worthy young man, liked by all who knew him, and many friends will regret to learn of his death.

The funeral will take place tomorrow afternoon at 2 o'clock from the First Christian church. Rev. W. H. Pinkerton officiating. The burial will be at Oak Grove, under the auspices of Mangum lodge, I. O. O. F.

Gons. J. F. Wade and Wm. Ludlow are to go to Manila, probably to relieve Gons. Lloyd Wheaton and J. O. Bates.

THEY WAIVED

Hicks and Lowe Did Not Want a Preliminary Trial For "Short Changing."

GAMESTERS FINED TODAY

One Who Ran Away Was Stuck For \$50 and Costs—Several Offenders Were Held.

ELMENDORFF'S CASE WAS CONTINUED

Judge Sanders had a big court this morning, and several offenders were held over on felony charges. Quite a concourse of spectators was present to see the "dead game" sports surprised in the midst of a fascinating game at the Inkenois club Sunday night. Four pleaded guilty and three were fined \$20 and costs and another, who has left town, was fined \$50 and costs. No other warrants have yet been issued.

Robert Hamilton, colored, who was running the crap game on South Ninth street Sunday night, was presented for setting up a game, a felony charge, and said he wanted to plead guilty. The court heard the evidence and the case was so plain he was held over in the sum of \$150, and in default of bond went to jail.

J. C. Lowe and Chas. Hicks, the young "con" men arrested Saturday night for "short changing" at Poage's clothing store and Schroeder's grocery, waived examination on two charges of obtaining money by false pretenses and were held in the sum of \$200 each in each case. Ernest Elmendorff, who is jointly charged with them pleaded not guilty and the case is set for Saturday.

Joe Seate and Tobe Williams, who had a fight on Lower Court street last yesterday afternoon, were fined \$20 and costs and \$10 and costs respectively.

Annie Holland, colored, for being drunk and disorderly last night, was fined \$3 and costs.

Ed Moore, colored, charged with cutting Jim Miller's pocket and robbing him of \$1.85 at a Second street saloon, was held over in default of bond, and was remanded to jail.

MARRIAGE LICENSES.

E. N. Culp, aged 20, a farmer, and Miss Alice Roark, aged 17, of the county, were licensed to marry today. The wedding will take place tomorrow.

C. E. Rudolph, aged 20, of Ballard county, and Miss Lucy Pearl Terry, aged 19, will also be married tomorrow.

THE WEATHER.

The weather predictions are for fair and colder weather. The mercury went to 28 last night, but is expected to go to 12 or 14 above by morning.

Governor Sayers' report just made to the legislature shows that \$1,988,414 were contributed to Galveston and vicinity because of the storm last September. Every nation under the sun contributed to the sum.

THIS WILL CURE YOU

LOWER ASSESSMENT.

THE STATE BOARD REDUCES THE L. C.'S ASSESSMENT IN M'CRACKEN.

The assessment of the Illinois Central railroad on its property in McCracken county has been received by County Clerk Graham from the state auditor and shows quite a difference between this year and last year's assessment.

This year the total assessment in the county is on \$559,100, the amount in last year \$255,480. The Union Depot company is assessed on \$20,300, while last year it was assessed on \$50,000.

Last year the assessment in the county was on \$561,850, and the city's portion, on \$304,120.

The reduction is made in the property outside of the mileage. The rate on trackage is greater than last year, being this year \$56,430 mileage. All other property is assessed at \$199,000.

City Tax Collector Kraus believes the railroad hospital and Huntington Row, assessed at \$15,000 each last year, were omitted through error. Mayor Lang thinks the change was made because of the removal of the passenger depot and the conversion of the former passenger depot into a freight house.

CIRCUIT COURT.

DAVIS CASE WENT TO THE JURY AT NOON TODAY.

The damage suit of G. W. Davis against the Colquhoun Co. for \$2,000 was given to the jury at noon today, after a trial lasting several days.

The suit of Rachel Davis, colored, against the Paducah Railway and Light company, for \$2,000 damages for injuries, is now on trial.

The suit of J. E. Robertson against O. F. Noel was continued.

In the case of W. A. Gardner against A. S. Miller judgment was rendered for \$80.20 against Nancy J. Miller and the case was continued as to A. S. Miller.

TEMPORARILY INSANE.

CHARLES SEXTON HAD TO BE COMMITTED TO JAIL.

Charles Sexton, the well known bartender, has been temporarily insane for the past several days, and was last night committed to jail to prevent his injuring himself, or some one else, having tried to jump out a second story window.

As his trouble is thought to be temporary, he will probably not be tried for lunacy. His brother, from Alabama, who is here, will probably take him to Alabama as soon as he recovers.

BIRTHPLACE OF CYCLONES.

Rocky Mountains Their Home, Their Cradle and Beginning.

For the world west of the Mississippi the Rocky mountains are the points of origin not only of the rivers and water flows, but of the condensing of the moisture of the air, the banked snows, the subterranean currents which form the basis of the entire watershed, says Ainslie's Magazine. Their cold altitudes seem to shed the waves in the plains below, and in their battles generate the cyclones and the lesser windy tempests which devastate the western plains. They are the beginning of the heart-breaking blizzards, which tie up the traffic of the metropolitan streets or chill beyond endurance the homes of the poor. They are, in a word, the atmospheric top of the continent, but of the condensing of the moisture of the air, the banked snows, the subterranean currents which form the basis of the entire watershed, says Ainslie's Magazine. Their cold altitudes seem to shed the waves in the plains below, and in their battles generate the cyclones and the lesser windy tempests which devastate the western plains. THURSDAY, JAN. 31, 1901.

Indiana is about to make electrocution the legal mode of execution in that state.

The legislatures of Oregon and Nebraska as well as the assembly of Delaware are deadlocked on selection of United States senators.

Mrs. Nation's mode of conducting a temperance crusade is effective, but it is most wasteful. Can't she be induced to just attack the spigots and let the bangles alone?

What if the West Pointer did promise to be good? Having broken the rules would they break their words? Put the penalty to them: this will be no more than is required or deserved.

Thirteen years hence the house of Hanover will be celebrating the close of 200 years of rule in the British Empire, and there is a fair prospect that Edward VII. will be on hand to have the honor of the occasion.

The Pratt-Breckinridge attorney general contest appeal case has been granted a hearing in the appellate court and entered for trial at the April term. The case is to come up regularly and may not be reached for a year.

This is a good time of the year to think of your garden and to do other work preliminary to planting, but it is not the season to do any work in the soil. There must be more winter before the spring opens, and the indications are that as there has been no winter weather as yet spring will be very tardy in action.

Teddy and the lions are lying down together in Colorado; but they are not occupying the same bed. Teddy is taking his rest in Manitou and the lions in their mountain fastnesses. By the by, it is now said the Rough Rider has not really been lion hunting, but out shooting chipmunks, rabbits and woodpeckers. This does even the the greatness of Teddy pale.

The Georgia legislature recently voted down three bills that had been largely asked for by the women of the state—one raising the age of protection of girls from 10 to 12; one prohibiting the labor of children under 12 in factories, and one admitting young men to study in the State textile schools. This strange legislation has aroused much indignation among the women of Georgia.

The Sun has information that Mr. Harmon L. Sedberry, who is mentioned as the anti-primary candidate for county attorney of Livingston county, will accept the nomination on that ticket. The Sun has known Mr. Sedberry for several years. He is one of the brightest young lawyers in Western Kentucky. He is a staunch Republican, but has legions of friends in both parties in Livingston county. He campaigned in the county in '99 and 1900 and did excellent work for his party. He represented Livingston county in the Republican state convention at Lexington. He is the only Republican lawyer that was ever admitted to the bar in Livingston county. Mr. Sedberry has been mentioned as a candidate for representative to represent Crittenden and Livingston county in the next general assembly of Kentucky. He will make a strong candidate and The Sun is pleased to see the anti machine element recognizing his worth.

THE TIP NUISANCE.

The Sun is pleased to note that a crusade is being waged in the east against the "tipping" of waiters and other employees of hotels. This nuisance has reached such a state of extortion that the traveling public has revolted and it is right they should. When a hotel charges from \$3 to \$5 a day it should pay its employees for their time and demand that the best of attention be given its patrons without further payments by them. It has gotten to be such a graft that the travelers are picking out the hotels that do not permit their employees accepting tips. A person doesn't object to paying for what he gets at a good hotel, but he does object to being "held up" by employees whose duty it is to serve his wants. If the hotels that do permit their employees accepting tips will advertise the fact the others will soon follow their example, or be compelled to quit business.

Let the good work proceed. Let the hotels that are opposed to the graft post notices asking their patrons to assist them in breaking up the practice. They will find a willing response and hearty co-operation from a long

KIND OF HUSBAND

I Should Choose For My Daughter.

HEALTH, UNSELFISHNESS AND EDUCATION.

(By Harriett Prescott Spofford.)
The only way in which with safety to all concerned a mother can help her daughter in the choice of a husband is when—having studied from birth the nature and needs of her daughter, and having confessed to herself that marriage is the best and happiest state—she looks about her for one whose qualities are those that shall ensure the welfare and happiness of her child; and then quietly and discreetly, and without putting her purpose in evidence, brings the two together, conscious that propriety is as potent as any other factor. Every mother has not only a right but a duty in relation to a child's marriage. You often hear a man of very moderate desert say that he requires in a wife virtue, birth, breeding, beauty, good nature, education, money and other superlative gifts; so why shall a mother be less demanding in behalf of her daughter? It will then go with-out saying that this husband of a sweet and innocent and carefully reared girl shall be a satisfactory specimen of the race, manly, brave and good to look upon. That means that he will have good health; and having good health he will have good nature, and good nature is very necessary to household happiness. If he loves his

neighbor as himself, he meets the chief requirement for the happiness of wife and family; for then he is unselfish. The unselfish man is a natural Christian. Thus, on the whole, unselfishness is the first positive quality that I should require. For with unselfishness there will be that generosity which not only gives with an open hand, but which so regards the feelings and wishes of others as to make ill-temper and dark moods impossible. With unselfishness there will be self restraint and sobriety and honesty and fidelity. With unselfishness, again, will be purity—the safeguard of home. In addition to this unselfishness, which is at the root of most if not all of the virtues, I should like to see in this aspirant husband of a daughter. I would like, moreover, that he should have education. But there is an education of circumstances which surpasses that of books, that makes mere knowledge of disputable facts and technicalities seem small and trivial; and if he has that we will not miss the education of the university, desirable as that may be.

Now, dear reader, I must confess to you a secret—very probably an open secret if you have gone with me thus far. I must confess to you my dreadful poverty. I have no daughter for this matchless man.

AT FIRST GLANCE

IT WOULD APPEAR THAT LOCAL REMEDIES WOULD BE BEST FOR CURE OF CATARRH.

It would seem at first glance that catarrh being a disease of the mucous membrane; that salves, sprays, etc., being applied directly to the membranes of the nose and throat, would be the most rational treatment, but this has been proven not to be true. The mucous membrane is made and repaired from the blood and catarrh is a blood disease and any remedy to make a permanent cure must act on the blood, and when the blood is purified from catarrhal poison, the secretions from the mucous membrane will become natural and healthy.

In this climate thousands of people seem scarcely ever free from some form of catarrh; it gets better at times but each winter becomes gradually deeper seated and after a time the sufferer resigns himself to it as a necessary evil.

Catarrh cures are almost as numerous as catarrh sufferers, but are nearly all so inconvenient and ineffective as to render their use a nuisance nearly as annoying as catarrh itself. Anyone who has used douches, sprays and powders will bear witness to their inconvenience and failure to really cure.

There are a number of excellent internal remedies for catarrh, but probably the best and certainly the safest is a new remedy, composed of Eucalyptol, Hydrastis, Sanguinaria and other valuable catarrh specifics.

This remedy is in tablet form, pleasant to the taste and sold by druggists under the name of Stuart's Catarrh Tablets, and anyone suffering from catarrh may use these tablets with absolute assurance that they contain no mercury, opiate nor any poisonous mineral whatever.

A leading druggist in Albany speaking of catarrh cures says: "I have sold various catarrh cures for years, but have never sold any which gave such general satisfaction as Stuart's Catarrh Tablets. They contain in a pleasant, concentrated form all the best and latest catarrh remedies, and catarrh sufferers who have used douches, sprays and salves, have been astonished at the quick relief and permanent results obtained after a week's use of Stuart's Catarrh Tablets." All druggists sell full sized packages for fifty cents.

The properties of BALLARD'S SNOW LINIMENT possesses a range of usefulness greater than any other remedy. A day seldom passes in every household, especially where there are children, that it is not needed. Price 25 and 50 cents. DuBois & Co.

Horses in Demand Everywhere.
The horse business is good all the world over. One hundred and fifty thousand horses and mules have been landed in South Africa since the beginning of the war.

Many of the blotches, pimples and other affections of the skin are caused by the failure of the liver and kidneys to cast off impurities, which remain in the system. HERBINE will stimulate the liver and kidneys, and cleanse the system of all impurities. Price 50 cents. DuBois & Co.

Fast Electric Car.
A New England company has turned out an electric car capable of making sixty-five miles an hour. It is to run on the seventeen-mile road between Providence and Fall River, and is expected to cover the distance in sixteen minutes. "It is remarkable how the peculiarities of travelers are indicated by the satchels they carry," says the superintendent of a depot baggage-room, "and after one has handled baggage for ten years he can read its owners as well as if he had a personal acquaintance with them."

To Cure a Cold in One Day
Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

When searched, a New York beggar was found to have 531 cents in his coat. He had collected them in less than half a day. At this rate his income would be \$3,550 a year.

Observations
...at Random

There are a great many pleasanties among the various candidates for office, and although there are scores in the contests, the best of feeling seems to prevail, and when the aspirants meet they never fail to joke one another about their respective prospects.

The other day Attorney R. T. Lightfoot and Squire J. M. Ezell, who were out in the brush canvassing in the interests of their respective candidacies for county judge, met.

"Hello, Dick," said the "squire."
"I've met one man so far who's for you."

"Well," retorted the attorney, "that's one more than I've found for you."

"Yes, but the fellow I saw was one you'd got out of jail over in Illinois and can't vote," laughed the "squire" as he drove on.

Judge W. M. Reed, formerly of Marshall county, enjoys a joke on himself as much as one on anybody else, and relates this one on himself.
One day a man called on him in Benton. The big lawyer had his office there, but his family and many of his relatives lived some distance in the country. The man wanted to secure his services to aid him in procuring a tavern license in the Pilot Oak section of the county.

"I'll tell you, judge," he earnestly declared, "we certainly need something of the kind out there. The drummers come and there is no place for them to stay. And," he continued confidentially, "it's the best place in the county to sell whiskey. Why, it's in the very heart of the Reed country!"

The judge began to smile at this powerful argument, and the expression on the man's face, as it dawned on him that he was addressing the mighty head of the Reed family himself, was amusing to see. But the tavern license was a short time afterwards granted.

A social note of interest in Paducah comes from New York. Mrs. Mabel Munro Lanagan entertained on Thursday, the 24th inst., in honor of Miss Margaret McIntyre, the Scottish Prima Donna, daughter of Major General MacIntyre, of Scotland, and a member of the Metropolitan Grand Opera company. She was assisted in receiving by Baroness Von Ettnar, Baroness Von Tenber, Miss Edith Rosenthal, Miss Nina Pictou and Miss Eugenia Clark, the latter of Paducah.

When it was learned that the Brookhill was aground up at Stewart's island, somebody accented Capt. Joe Fowler down on Monkey Wrench corner and asked him when she would be off.

"Well, I don't know," grimly responded Captain Joe. "You never can tell about these things. Now when she left Paducah the bar was on the bar!"

It may be that these tramp stories have been told before, but the lady who relates them declares they are from her own individual experience.

A ragged specimen, hobbled around to the back porch the other day and finding her engaged in some domestic duty obsequiously doffed his hat and said: "Lady, would you please give me some of your husband's old clothes. You can see for yourself that I need them worse than he does."

She was confused for a moment, but rather than confess that she was an old maid, she quickly replied, "My husband doesn't have old clothes."

It was only a day or two later that another hobo called at the same back door.
"Madam," he began as soon as she appeared, "could you please give a poor, penniless unfortunate a dime?" She gazed at his tattered garments a moment, and her heart melted in pity.
"Certainly," she replied. "Can you change half a dollar?"

For a Cold in the Head
Laxative Bromo Quinine Tablets.

Harbour's
This Store Abounds in Bargains.

PRONOUNCED PRICE REDUCTIONS FROM NOW UNTIL MARCH 1.
Our reasons for making this protracted cut price sale we deem useless to publish. The actual cut prices are the features of interest to the public.

House Work is Hard Work without GOLD DUST.

Man's First Appearance.

Writer in the Nineteenth Century Dates It Back About 5,000,000 Years.

In endeavoring to determine in what particular part of the world the human race developed, for the readers of the Nineteenth century, Samuel Waddington finds it necessary, first, to consider its antiquity; and though he speaks as a man of letters and not as an original investigator of those scientific problems, his attempt to show that man dates back more than 1,000,000 years is not without considerable force.

From the fact that no human bones have been found which clearly precede the quaternary period it has been supposed that the race could not well be more than 100,000 years old. But Lyell has remarked upon the singular disappearance of bones which are comparatively modern. Thousands of Dutch and Spanish soldiers perished in the Lake of Haarlem only three centuries ago. Yet when the Dutch government drained that body of water in 1853 not a solitary skeleton could be discovered there, although fragments of ships were exhumed. If in so short a period as this bones can be resolved into their original elements, how nearly hopeless it is to seek for those belonging to an era thousands or millions of years earlier. The argument drawn from such a failure, therefore, is extremely weak, especially since stone implements and chips left in the process of manufacturing them have been discovered in deposits that appear to antedate the glacial epoch, which extended from about 24,000 to 80,000 years ago.

Darwin thought it possible that primitive men existed in the earliest of the three divisions of the tertiary period, the eoene, and Wallace is confident that such was the case. Huxley, touching upon the ancestors of man rather than man himself, declared that they should be looked for in an age as far removed from the present time as that of the latter is from the present time. Scientists as well as progressive theologians now believe in the evolution of man from a slightly lower form of animal, but anthropologists are not inclined to think that the human race is deprived directly from any existing species of ape. The generally accepted notion is that the modern ape represents a collateral branch merely, and the divergence of man from the parent stock is assigned to the middle stage of the tertiary, the miocene, or to the eoene. Now, Dana estimates the interval which has elapsed since the beginning of the tertiary at about one-twentieth of all geologic time, while others believe that the earth has been in a condition to sustain life from 20,000,000 to 100,000,000 years. The opening of the eoene, then, is thus carried back between 1,000,000 and 5,000,000 years. This calculation is by no means final and definite; about it discredits the 100,000 year

basis almost as much as it does Archbishop Usher's quaint chronology. Having thus disposed of the question as to the time when man made his debut on this planet, the nineteenth century writer cites Sir Archibald Geikie and other geologists regarding the climate of central Europe and Asia 1,000,000 or more years ago. Even in the Arctic regions, during the miocene the mildness of the temperate zone prevailed. There were dense forests where nothing but ice is now found. Water lilies grew within eight degrees of the pole. In Europe mountains there flourished the lion, elephant, hippopotamus, rhinoceros and other animals which at present seem peculiar to the tropics. One of their contemporaries in France was a large fruit-eating tree-climbing ape, called dryopithecus. Lartet and Gervais regarded this creature as more nearly allied to man than is either the gorilla or chimpanzee. In the miocene period the climate of Europe was fully 20 degrees warmer than it is now, and in the eoene it would probably have been still more so, the globe having less opportunity for radiating off into space the store of original heat that is commonly imputed to it.

Where, then, under these circumstances would man's evolution be most likely to occur? Haeckel puts the cradle of the race in Southern Asia and he has recently gone to Java, where Dubois found his missing link, pithecanthropus erectus, in the hope of obtaining further evidence in support of that view. Wallace looks further north for the origin of man, while Darwin thought it possible that he made his first appearance in Africa. In view of the residence of Lartet's anthropoid in France in the miocene period and of the discovery of a great number of prehistoric stone implements in England, France, Belgium and Germany, Mr. Waddington was at first disposed to pronounce Northwestern Europe the much sought cradle of the race, but there is a difficulty that bothered him: Stone implements and chips have been found in America which appear to antedate the glacial period, and the question arises, how did their makers ever get to this continent? Behring strait offers a better route, apparently, than Iceland and Greenland. Accordingly the nineteenth century contributor feels obliged to shift the early home of man considerably to the eastward of the site first selected. Thus by degrees he is forced to the conclusion that the cradle of the race lay in Northern Asia, between the Ural mountains on the one hand and Behring strait and Okhotsk sea on the other. Siberia is now the coldest country in the world, but the discovery of immense quantities of fossil ivory there shows that once its climate was almost tropical.

UNCLE SAM RICH IN MINERALS.

ERY PART OF HIS DOMAIN YIELDS SOME VALUABLE PRODUCT.

(Lettie's Weekly.) No section of the United States has been neglected in the distribution of valuable mineral supplies. Where iron ore of one sort is lacking another is given. Where iron and coal are denied, and such regions are few in the United States, there is stone or clay or the precious metals. The mining districts of the east are broadly speaking controlled by the general trend of the Appalachian mountains. On the east side of these mountains, from the Hudson river to Georgia, there extends a more or less continuous line of magnetic iron ore deposits. This is paralleled by a zone of low grade ores and by another of copper ores. West of these regions are found the brown hematites, most valuable in Alabama, Tennessee and Virginia. Passing to the interior basin of the continent we find the eastern and central part underlain by vast fields of coal. The metal deposits appear in groups. One such group contains the magnificent copper and red hematite iron ore deposits around the head of Lake Superior. Another group contains the lead and zinc and red oxide of Missouri.

In the western part of the United States the grouping of metals is most striking, as it assumes the form of a series of irregular bands or belts extending from north to south and corresponding to the longitudinal trend of the mountain systems. Passing westward we first note a sharply defined gold belt found in New Mexico, Colorado, Wyoming and Montana. West of this, and extending through New Mexico, Utah and Western Montana, is a line of silver lodes. A second line of silver mines stretches from Mexico to Idaho, through Arizona and Nevada, while a third chain skirts the eastern slopes of the Sierras.

The western foothills of the Sierras are so marvelously rich in gold veins and placer deposits as to be known to all the world, while shortly farther down into the valley of California is a copper belt. The region of the coast ranges affords quicksilver and iron.

THE MAN IN THE MOON.

THE SPANISH LEGEND AS TO HOW HE GOT THERE.

One Sunday morning, long, long ago, there was a man who went out to the forest to cut wood. He made a great bundle of sticks, and was just about to place it upon his shoulders when a beautiful young man, dressed like a fine lord, appeared to him. "How it is," said the stranger, "that you have been cutting wood today? Do you not know that this is the Sabbath, and that on Sunday, which is the day of rest, no man should work?" "What do I care," retorted the wood cutter, "hitching the huge bundle higher on his back, 'whether it is Sunday or Monday (Monday)? It is all the same to me.'"

"Well, then," replied the fair youth, who was no other than Our Lord himself, "since it is the same to you, you shall go to a place where every day is Monday."

And he sent him forthwith up to the moon, where he may be seen carrying his bunch of faggots till doomsday.

LOOK—A STITCH IN TIME. Saves nine. Hughes' tonic, new improved, taste pleasant, taken in early spring and fall prevents chills, dengue and malarial fevers. Acts on the liver, tones up the system. Better than quinine. Guaranteed. Try it. At druggists. 50c and \$1 bottles.

The Grand Opera House in Cincinnati was burned Tuesday night. E. H. Sothern was playing "Hamlet" to a large audience when the fire broke out. The people kept their composure and escaped without a panic.

Gov. Beckham has issued pardons for William Nicely and Edward Schott, convicted of an assault on J. Allen John R. Pfanz, of Louisville, in June, 1899. Jailer Pfanz was one of the signers to the petition for clemency.

Street Railway Bureau. Street railway strikes are not limited to America, as about 800 employees at Budapest have recently struck for an increase in pay and reduction in hours.

WRITTEN AT RANDOM

"No one except a drummer knows what hotel life in a country town is like," declared a traveling man in the depot lunch room the other day. I had an experience not long ago down in Tennessee that beat the band.

"I had been out in the country and got in late. The hotel clerk was busy writing a letter near a small smoky lamp, and didn't have time to show me to a room. The porter, who was also waiter and bell boy, was out in society, and the clerk said: 'Go up those steps and take the first room to your right. Maybe somebody's in it, but it's the best we can do tonight. Key's in the door.'"

"Well, I was glad to get any kind of lodging, and the clerk was such an indifferent specimen of innocent assimilation that I didn't have the heart to kick. So I just climbed those steps and went to the first room to the right. The door was partly open, and I saw by the dim lamp light that there was a man in the bed.

"Hate to disturb you, but I guess I'll have to ask you to share your bed with me," I said cheerfully as I began to disrobe. The man said nothing and I concluded he was either some grumpy old codger who didn't relish the intrusion or else was too sleepy to either remonstrate or be civil. I piled in and gently shoved him over. Then I fell asleep.

"I don't know how long I slept, but I was disturbed by voices. I cautiously peeped from beneath the cover and saw a young man and woman sitting in the room. They were talking in low whispers, and presently he pulled her over to him and kissed her. "George," she said reproachfully, "how could you with poor cousin George lying there dead!"

"When she said dead, gentlemen, I elevated that cover and went straight up, accompanying my action with a whoop that must have been heard all over town. When I lit I grabbed my clothes and in a dark corner of the hall dressed.

"Meanwhile I heard feminine shrieks and ejaculations of surprise from the men, and doors all up and down the hall began to softly open, and half clad figures to peer in sleepy curiosity through the cracks.

"The young man who kissed the girl was running wildly about begging someone to send for the doctor, declaring that the dead had arisen, and the clerk downstairs had actually abandoned his letter long enough to assure the seely looking individual with a conspicuous star on his bosom and the breath of divers 'high balls,' that no murder had been committed.

"I indignantly asked the clerk what in the h—l he put me in bed with a

corpse for, and about that time the doctor arrived. The clerk laughed idiotically until his sides ached, and the doctor was sent to attend the young lady who was in the room when her cousin George came to life. But when he heard the facts he caught the laughing fever so good and strong himself he could do nothing for her.

"I got out of that place, and have never been back, but if that clerk and I ever meet again, there'll be a rough house, sure. Think of him putting a man in bed with a corpse. Now wouldn't that jar you!"

And relighting his cigar the drummer ran out to get aboard the train.

Since it was announced that persons who swept trash from business houses on to the street would be prosecuted, a few porters have resorted to a new device to evade the regulation. They sweep the trash up about the front door, and when no one is looking suddenly shove it all out on the sidewalk and leave it there.

While the pavement is not so good a receptacle as the street it is better than having the trash on the floor, it is argued. The subterfuge will not work long, however, for after those who have been addicted to the custom have been given a few days to reform, warrants will be sworn out for all violations of the ordinance.

While it may not be cited as a cause for so many marriages in Metropolis, it is cheaper to have the knot tied in our neighboring city than in Kentucky. It now costs \$1 to get a license there, but a movement is on foot and is being sanctioned and encouraged by Southern Illinois papers, to increase the fee to \$2. The matrimonial business has been so on a boom in the celebrated Gretna Green that the natives think they see a way to reduce taxation by increasing the cost of getting married.

Says the Metropolis Herald: "A man would be more likely to realize the responsibility and seriousness of a marriage obligation if it cost him something, and further, a man who is not able to pay \$2 for marriage license had better join some bachelor's club and stay out of the Cupid business."

UNBIASED OPINIONS. If you tell a woman she is good she may thank you. Tell her she is pretty and she will love you.

One reason why a little learning is a dangerous thing is that its possessor is likely to write a historical novel. Many a man has killed himself trying things that were supposed to prolong life.

No woman ever took the conceit out of a man by refusing him at first and finally consenting.—Chicago Herald.

Earliest of Sea Fights. The earliest authenticated sea fight is said to have been that between the Corinthians and the Ceryceans, in which the former conquered—664 B. C.

BRYAN WILL SPEAK.

IS TO ADDRESS HOUSE COMMITTEE ON COINAGE.

Washington, D. C., Jan. 24.—W. J. Bryan will be asked to give the house committee on coinage, weights and measures his views on the present monetary situation of the country. The committee is considering legislation to make silver dollars and silver certificates redeemable in gold, and has heard many prominent financiers on this question.

The committee yesterday heard Representative Fowler of New Jersey and Henry W. Peabody, a member of the Boston chamber of commerce. Mr. Fowler advocated redeeming all the silver dollars into halves and quarters, and calling in all the one dollar bills. The silver dollar was unhandy and the paper dollar was unsanitary, he said. Mr. Peabody was in hearty accord with the proposition to make silver redeemable in gold. He held that our silver money was a burdensome legacy that the nation would have to take care of.

Mining of timber is not peculiar to China alone. In that country, in Tong-Kin, in a sand formation at a depth of from 14 to 20 feet there has been found a deposit of the trunks of heavy trees, and the Chinese work this mine for the timber, which is found in good condition, and is used in making troughs and for carving and other purposes. In the swamps throughout the Southern States of this country have been found many deposits of valuable timber, and it is unnecessary to say that many of them are being worked for all there is in them.

SUCCESS—WORTH KNOWING.

Forty years success in the south, proves Hughes' tonic a great remedy for chills and all malarial fevers. Better than quinine. Guaranteed, try it. At druggists, 50c and \$1 bottles.

Archbishop's salaries. The English church pays the archbishop of Canterbury, Dr. Temple, £15,000 a year, while his colleague of York and the bishop of London, are paid £10,000.

Own a Fine Overcoat
